

# ARIZONA Planning Bulletin

Lake Havasu Resource Management Plan

Bureau of Land Management • Lake Havasu Field Office

January 2003

**Thank You** for your interest and involvement in planning for public lands. This bulletin is intended to provide you with information on the progress of our Resource Management Plan. Your comments are always welcome, and we look forward to your continued participation in the development of this management plan.

## RMP Issues & Alternatives

The Bureau of Land Management Lake Havasu Field Office manages 1.4 million acres of public land in Arizona and along the Colorado River in California. BLM is developing a new Resource Management Plan (RMP) for the area to replace the four existing and outdated management plans.

Public meetings and other outreach efforts were conducted last year to seek public input for the new Resource Management Plan. BLM received hundreds of comments and recommendations for managing the resources and public lands. The comments have been reviewed and compiled into a Scoping Report, which will guide us in developing the RMP. Most of the comments received focused on access to public lands, trails, land disposal and wilderness issues.

**Scoping Report is now available** for your review on the internet and from the BLM Field Office. To request a copy to be mailed to you, please contact our Resource Management Plan Team Lead Gina Trafton (928-505-1273, or toll-free at 1-888-213-2582). The report will also be available at the Open Houses (see schedule).

### *On the Internet*

BLM offers a variety of program information and the RMP Scoping Report on our website:

## Public Outreach & Scoping Open House Meetings Scheduled for 2003

A series of public open house meetings will be held to review the Scoping Report, and for the public to provide further direction for the RMP.

### Meetings will be held at the following locations:

- |                      |   |
